

Job Title : GIT – Public Transport
Department : Technical Services
Reports To : Public Transport Manager
Location : Municipal Council of Mbabane, Eswatini

1. Purpose of the Job:

To develop skills and gain hands-on experience in various aspects of public transport operations (stakeholder engagement, strategy formulation, data analysis, operations management, financial management and many more). The program aims to prepare the trainee for a long-term career in the public transportation and mobility sector by exposing them to real-world challenges and projects.

2. Key Responsibilities:

- Analyse public Transportation data to identify trends and areas for improvement.
- Conduct research and studies on public transportation routes, schedules, operating hours, services, and facilities, and recommend service improvements.
- Engage and manage relationships with stakeholders locally, regionally, and internationally
- Advising stakeholders on trends and developments in the public transport and urban mobility sector.
- Assist in the implementation of the Total Quality Management and ISO standards in the transport and mobility sector
- Prepare weekly, monthly, and quarterly reports on public transport and urban mobility
- Assist in the planning of public transport facilities, and vehicular and pedestrian traffic flow within the Municipality

3. Qualifications:

- Degree in Passenger Transportation
- Degree in Transportation and Logistics
